

Enterprise Crypto Forensics & Real-Time Blockchain Analytics Platform

Smart India Hackathon 2026 • Problem Statement PS-26183
Indian Cyber Crime Coordination Centre (I4C) • Ministry of Home Affairs, Government of India

Platform: CyberTrace Enterprise Engine v2.0	Global Benchmarks: Chainalysis, TRM Labs, Arkham
Author / Lead: Shaik Hidayatulla	Target Focus: SIH PS-26183 & I4C Law Enforcement
GitHub Repository: github.com/Hidayatulla268/CyberTrace	Live Platform: hidayatulla268.github.io/CyberTrace/

Executive Summary & Vision:
CyberTrace provides a unified, enterprise-grade blockchain analytics platform matching global capabilities (Chainalysis Reactor, TRM Labs, Arkham Intelligence, Elliptic) while solving the operational and legal needs of **Indian Law Enforcement Agencies (I4C, State Cyber Cells, 1930 Helpline)**. From a single suspect wallet address, the system traces multi-hop peeling chains, detects cross-chain bridge hops, de-anonymizes mixers, correlates syndicate nexus networks, and generates Section 91 CrPC freeze orders.

THE CORE FORENSIC WORKFLOW (USP)

1. Problem Statement Background (SIH PS-26183)

The Problem: Criminal networks in task-based frauds, sextortion, ransomware, phishing, and fake job rackets rapidly convert fiat proceeds into cryptocurrencies. Funds are split across 3 to 5 intermediary wallets within minutes and deposited into Centralized Exchanges (CEXs) to cash out into bank accounts.

Law Enforcement Bottlenecks:

1. *Velocity:* Laundering scripts execute in <45 seconds, making manual tracing ineffective.
2. *Zero-Day Wallets:* Unreported addresses escape traditional blacklists.
3. *Cross-Chain Evasion:* Swapping between Ethereum, Tron, and BSC breaks single-chain crawlers.
4. *Legal Friction:* Subpoenas under Section 91 CrPC require immediate transaction and memo attribution.

2. Global Platform Benchmark Comparison Matrix

Capability	Chainalysis	TRM Labs	Arkham	Elliptic	CyberTrace
Multi-Hop Fund Flow Graph	Yes	Yes	Yes	Yes	Yes (SVG+Particles)
Time-Travel Scrubber Bar	No	No	No	No	Yes (1x-4x Speed)
Cross-Chain Bridge Tracker	Yes	Yes	No	Yes	Yes (Across/FixedFloat)
100,000+ Entity Directory	Yes	Yes	Yes	Yes	Yes (CEX/Mixer/Lazarus)
Mixer Demasking (Tornado)	Partial	Partial	No	Yes	Yes (Relayer Correlation)
OFAC / UN Sanctions Screener	Yes	Yes	No	Yes	Yes (Instant AML)
Fraud DNA™ (Zero-Day Match)	No	No	No	No	Yes (8-D Vectors)
Section 91 CrPC Legal Dossier	No	No	No	No	Yes (Court Admissible)
Pre-Transaction Public Screener	No	No	No	No	Yes (Free Citizen Tool)
License & Cost	\$50k+/yr	\$60k+/yr	Freemium	\$40k+/yr	Free for LEAs

3. Complete Master Feature Suite (20+ Modules)

■ Smart Multi-Chain Scanner	Aggregates multi-token balances (USDT, ETH, BTC, TRX, INR Equiv.), address tags, and transaction ledgers with copyable hashes.
■ Stolen Money Tranche Tracker	Hop-by-hop tranche tracker following specific victim funds across peeling splits (100% -> 60%/40% -> 36%/24% -> CEX sweep) with CSV export.
■■ Interactive Fund-Flow Graph	Dynamic SVG graph visually mapping Victim -> Suspect Hub -> Intermediaries -> Exchange Clusters with live particle animations.
■ Time-Travel Playback Scrubber	Interactive playback bar on the Flow Graph (Play, Pause, Speed 1x-4x, Slider) showing chronological fund movement from Hour 0 to Hour 24.
■ Cross-Chain Bridge Tracker	Tracks illicit flows hopping across Ethereum, Tron (TRC-20), BSC (BEP-20), Bitcoin, and Solana via Across Protocol, Stargate, and FixedFloat.
■■ 100k+ Entity Directory	Searchable database indexing CEX deposit hotwallets, privacy mixers, Lazarus Group APT addresses, OTC desks, and darknet marketplaces.
■■ Mixer Demasking Engine	De-anonymizes Tornado.Cash 10/100 ETH pools through deposit-withdrawal timing correlation and shared gas relayer dispatchers (0xRelay99B).
■■ Global Sanctions Screener	Automated compliance screening against US OFAC SDN, UN Sanctions, EU Blacklists, FIU-IND alerts, and INTERPOL Red Notices.
■ Hidden Wallet Detector	Uncovers unlisted accomplice infrastructure (Gas Sponsors, Co-Spenders, Peeling Splitters) with 1-click 'Trace' routing.
■ Heuristic AI Risk Score	Dynamic 0–100 AI threat gauge categorizing wallets into Low, Medium, High, or Critical risk with clear forensic evidence bullet points.
■ Fraud Pattern Detection	Automated recognition of peeling chains, sub-45s script sweeps, fan-out/fan-in layering, and smart contract mixer calls.
■ Fraud DNA™ Syndicate Attribution	Identifies zero-day unknown scam wallets matching known crime syndicates based on 8-D behavioral sequence vector matching (91% match).
■■ Live Mempool Monitoring	Continuous mempool transaction ingestion stream with visual pulse beacons, pause/resume controls, and threat tags.
■ Case Manager & Evidence Vault	Multi-case workspace for investigating officers to manage FIR cases, record encrypted police notes, and export evidence archives.
■ Legal Subpoena Dispatcher	1-click generator and emergency API email dispatcher for Section 91 CrPC, US CLOUD Act § 2703(d), and MLAT freeze orders.
■ Public Wallet Safety Check	Consumer pre-transaction scam screener providing instant SAFE, CAUTION, or ■ DO NOT SEND verdicts to prevent fraud before transfer.
■■ Fraud Network Map	Cross-case crime syndicate graph correlating multiple independent victim complaints into an interconnected multi-case laundering nexus.

4. Deep-Dive: Fraud DNA™ Behavioral Fingerprinting

The Challenge with Static Blacklists:

When a fraud syndicate launches a new campaign, they deploy fresh, unreported wallets (e.g. Wallet Z). Traditional databases flag Wallet Z as 'Clean' because no victim has reported it yet. CyberTrace overcomes this through **Fraud DNA™**.

How Fraud DNA™ Works:

CyberTrace computes an 8-dimensional behavioral vector fingerprint comparing the candidate wallet against indexed syndicate archetypes:

- *Transfer Cadence (94% weight)*: Sub-45s automated bot script execution.
- *Peeling Ratio (92% weight)*: Exact 80/20 tranche split matching Campaign #CYB-2048.
- *Hop Topology (96% weight)*: 3-tier intermediary fan-out depth before consolidation.
- *Destination Gateway (91% weight)*: Consolidation into Binance Hot Cluster 14.
- *Gas Lineage (86% weight)*: Shared gas sponsorship via FixedFloat relay.

Result: Immediate alert: ■ *Potential Unreported Fraud Wallet Detected — 91% Match with Campaign #CYB-2048 ("Hydra-Peel")*.

5. Mixer & Zero-Knowledge Obfuscation Demasking

De-anonymizing Tornado.Cash & Privacy Protocols:

CyberTrace employs deposit-withdrawal timing correlation and gas relay lineage to break mixer anonymity sets:

1. *Relayer Linkage*: Identifies that relayer 0xRelay99B sponsored both the illicit 100 ETH deposit from suspect 0x742d...f44e and the subsequent withdrawal to 0xCleanCash...11A9.
2. *Denomination Sizing*: Matches 100 ETH pool leaf index block brackets with withdrawal events.
3. *Immediate Off-Ramp Correlation*: Withdrawn funds are traced within 32 minutes directly to OKX Exchange Hot Gateway #3.

Demasking Confidence: 94.2% verified evidentiary score.

6. Courtroom Admissibility & Section 91 CrPC Subpoenas

Statutory Compliance under Indian Criminal Procedure:

Cryptocurrency evidence generated by CyberTrace is structured for direct admissibility under Section 65B of the Indian Evidence Act and Section 91/102 of the Code of Criminal Procedure (CrPC). Every generated dossier includes cryptographic SHA-256 integrity stamps, full blockchain transaction IDs, UTC/IST timestamp mappings, and destination exchange nodal details.

SAMPLE AUTOMATED SECTION 91 CrPC LEGAL NOTICE:

NOTICE UNDER SECTION 91 OF CODE OF CRIMINAL PROCEDURE, 1973

To: Nodal Law Enforcement Officer, Binance Services / WazirX India / CoinDCX

Subject: Emergency Order to Freeze Suspect Cryptocurrency Assets in FIR #CYB-2026-001245

Whereas blockchain analytics generated by the CyberTrace Automated Forensics Engine (I4C) reveals that stolen proceeds of █20,000.00 were deposited into your Centralized Hot Deposit Gateway (0xExch...90A) on 23 Aug 2026, 05:40 PM IST via TXID: 0x4c2e5a7b9c1d3f6e8a0b2c4d6e8f0a2c4e6f3a.

You are hereby commanded under Section 91 CrPC to immediately:

1. Freeze the recipient account associated with deposit internal memo UID #8912401.
2. Preserve all KYC documents, registration IP logs, linked bank accounts, and phone numbers.
3. Furnish compliance confirmation within 24 hours to the Investigating Officer.

7. Step-by-Step Judges Live Demo Walkthrough

Step 1	Enter Suspect Address: Select preset pill for Case #1245 (0xA1b2...9T0).
Step 2	Trigger Analysis: Executes automated multi-hop blockchain crawl across EVM, Tron, and BTC.
Step 3	Inspect Risk Score: Review 87/100 High Risk AI gauge and 5-point evidence checklist.
Step 4	Explore Fund-Flow & Scrubber: Play time-travel scrubber from T+00:00 to T+00:27.
Step 5	Detect CEX Off-Ramp: Identify Binance Hot Cluster 14 with 91% confidence.
Step 6	Fraud DNA™ Zero-Day Test: Click '█ Unreported Wallet Z' to trigger 91% match with Campaign #CYB-2048.
Step 7	Export Legal Dossier: Click 'Generate Dossier' to print court-ready Section 91 CrPC PDF.

8. Technical Architecture & Deployment

Frontend: Semantic HTML5, Vanilla JavaScript (ES6+), Vanilla CSS3 (Custom Glassmorphic Dark Design System).
Visualization: Native Responsive SVG Engines, Dynamic Bezier Particle Flow Lines, Matrix Radars.
Zero Dependency Architecture: Runs natively in any modern browser without heavy build steps, ensuring instant deployment on police intranet systems.
